

What's Hot...In the bathroom?

Bathrooms are taking on a whole new character. Gone are the showplace bathrooms, meant to impress others. And in, are bathrooms that are all about you. Your bathroom is your haven, your sanctuary, a place in your home that is private and special.

Spa bath is the term used in the industry to describe this kind of bathroom. So, what is a spa bath? Imagine walking into your new bathroom and the floors are toasty warm. Radiant heat under the tile is an affordable luxury. Now, imagine stepping into your beautifully tiled shower and turning on the rain shower head and steamer. The steamer will set you back a few dollars. But, it is well worth the price. Ahhh, sit down and relax. As you step out of the shower reach for your towel. It's warm! Towel warmers are another affordable luxury.

Spa baths are about pampering yourself in your own home. Some the other hot trends are jets in the shower, ergonomic whirlpool or air tubs, chromatherapy showers and baths, and specialty lighting. The most important thing to remember, however, is that the bathroom is about you.
